

**Flying H Genetics Quality Guaranteed Bull Sale
March 3, 2007
Arapahoe, Neb.**

Black GelPLUS/Balancers	\$2,741
Red GelPLUS/Balancers	\$2,647
Black Gelbvieh	\$2,532
Red Gelbvieh	\$2,125
Black Angus	\$2,125
130 Total Bulls	\$2,619

A cold, blustery winter day with blizzards all around greeted buyers from 16 states at the 27th Annual Flying H Genetics Quality Guaranteed Herd Bull sale held at the ranch by Arapahoe, Neb.

The selection of Gelbvieh, Angus and GelPLUS/Balancer bulls were topped by Lot 1, Flying H Power Forward 92S. This homozygous black, homozygous polled second generation Gelbvieh/Angus GelPLUS went home with Lammers Gelbvieh of Nebraska for \$9,000.

Topping the Gelbvieh division was Flying H Direct 33S, a moderate framed, high volume and very thick New Direction 905 X Cocoa herd bull. This homozygous black powerhouse went to Bruning Farms for \$7,000. He will be used on Angus cows so watch for his sons.

Top selling red bull was a GelPLUS/Balancer, Flying H Cherokee 520S. This ET with top 2% RE and top 10% MB brought \$5,000 for possession and 50 percent semen interest. He was selected by Geranium LDJ Cattle Co. of Plainview for use in their seedstock program.

The highlights of the sale were the number of repeat customers (some for more than 20 years), the number of bulls purchased sight unseen (34 percent) and the number of seedstock operations that purchased herd bulls (13 breeders from eight different states).

Volume buyers were Stan Farr, Mike Ourada and Shawn Hubbard.
