Transaction fees are based on date of postmark, indicating date mailed by applicant. If the correct fee does not accompany the application or prior payment has not been made, material will not be processed until payment is received.

Completing the registration application form. **(Please Use Ink.)**

- Dam's prefix and tattoo - should be complete and correct.
- Dam Breed - If the dam is non-registered Gelbvieh or non-Gelbvieh, indicate the dam's breed (see breed abbreviations on bottom, right of page).
- Dam's AGA registration number - must be complete and correct. **If the calf is an E.T., submit the donor dam's information, not the recipient's.** For non-Gelbvieh dams indicate the breed association which issued the registration number in the "Dam Breed" box.
- Year Born for non-registered and non-Gelbvieh dams, indicate the year born.
- Reproductive Status Codes - **A** = cow aborted **B** = cow open **C** = Cow pregnant when sold, culled or died  
**D** = cow used as an embryo donor **E** = cow used as an embryo recipient **F** = cow shifted calving season  
**H** = cow had no calf, other **W** = no calf data available.  
\***CALVING YEAR** corresponding calving year for status code reported.
- Dam Disposal Code - **6**=sold as a breeding animal - cert. transferred.  
**7**=sold as a breeding animal - not transferred. **8**=sold as a feeder calf. **9**=culled, open.  
**10**=culled, aborted. **11**=culled, had a dead calf. **12**=culled, inferior production. **13**=culled, poor udder/teats.  
**14**=culled, poor temperament. **15**=culled, bad feet/legs (unsoundness). **16**=culled, poor body condition.  
**17**=culled freemartin. **18**=culled/died - old age. **19**=culled/died - calving difficulty. **20**=culled/died - health.  
**21**=culled/died - injury. **22**=culled/died - prolapse. **23**=culled died - genetic defect/deformity.  
**24**=culled/died - other.
- Breeding information - check only one box.  
**A.I.** Check this box if the calf is a result of artificial insemination.  
**P.E.** check this box if the calf is the result of pasture exposure or a natural mating.  
**E.T.** check this box if the calf is the result of embryo transfer.
- A.I. Date/E.T. Implant Date - if the dam was AI'd enter the A.I. service date. If calf resulted from E.T. enter the implant date of the embryo in the recip. (Gestation length can not be calculated without appropriate dates.)
- PE From/To Date - Enter beginning and ending dates of pasture exposure or natural service. (mm/dd/yyyy mm/dd/yyyy)
- Sire Breed - If the sire is non-registered Gelbvieh or non-Gelbvieh, indicate the sire's breed.
- Sire's registration number must be complete and correct - **no names or A.I. numbers will be accepted.** For non-Gelbvieh sires indicate the respective breed association which issued the registration number in the "Sire breed" box.
- Calf Prefix - the 3 or 4 letter herd prefix assigned to the membership.
- Calf tattoo - the identification of the calf. It must include the international year code:  
**N** (2003) **P** (2004) **R** (2005) **S** (2006) **T** (2007) **U** (2008) **W** (2009) **X** (2010) **Y** (2011).
- Birth date - is mandatory for registration or computation.
- Sex of Calf - is mandatory for registration or computation. **B** = bull, **C** = cow, **S** = steer.
- HPS: **H** = horned or dehorned, **P** = polled, **S** = scurred.
- Color - **1** = black **2** = red **3** = gray **4** = black, white face **5** = red, white face  
**6** = white **7** = cream **8** = spotted **9** = gold **0** = other
- Birth Weight - should be taken as soon after birth as possible. It is not mandatory, but encouraged.
- Calving Ease - **1** = unassisted **2** = easy pull **3** = hard pull **4** = caesarean **5** = abnormal presentation
- Number Born - is mandatory, **1** = single **2** = twin to bull **3** = twin to heifer **M** = multiple birth  
If more than one calf is being submitted out of a single dam **use a line for each calf.**
- Birth Group - **optional, use one or two digit number or letter to denote birth contemporary group.** AGA automatically divides contemporary groups by sex and birth within 90 days. If a group I. D. is not specified, animals of the same sex and birth within 90 days will be ratioed together.

- Dam Temperament at Birth - (1-5): **1** = very docile **5** = very wild (please use whole numbers only)
- Name - **the prefix is automatically part of the name.** 24 additional spaces are available for the name, including all letters, numbers, punctuation and spaces. Embryo Transfer calves must have ET included in the name. Any unnamed calf will automatically be named using its prefix and tattoo.
- Calf Disposal Code - If the calf is disposed of, please assign on of the following disposal codes:  
**1** = died on arrival (calving difficulty) **2** = died on arrival (other) **3** = died pre weaning (health)  
**4** = died pre weaning (injury) **5** = died pre weaning (other) **7** = sold as a breeding animal - not transferred  
**8** = sold as a feeder calf **12** = culled, inferior production **14** = culled, poor temperament  
**15** = culled, bad feet/legs (unsoundness) **17** = culled, freemartin **21** = culled, died (injury)  
**23** = culled, died genetic defect/deformity **24** = culled/died (other)
- Weaning Weight - is mandatory for females and bulls. the actual weight on the day weaned. Weaning weights must be taken between 160-250 days to avoid an inexact adjusted weaning weight notation. The computer will adjust all calves to a standard of 205 days of age and will adjust for age of dam. Registration certificates are issued to heifers after weaning data is submitted. Performance Pedigrees are issued to bulls after weaning data is submitted.
- Weaning Hip Height - is **optional**, taken on the same day as the weaning weight and reported in inches to nearest tenth. Can also be taken at yearling, if so report in box 34.
- Weaning Date - is mandatory. The date the weaning weight was taken. Different weigh dates will designate different contemporary groups.
- Weaning Group I.D. - **optional, use one or two digit number or letter** to denote weaning contemporary group. AGA automatically divides contemporary groups by sex and date weighed. If a group I.D. is not specified, animals of the same sex and whose weaning weights were taken on the same day will be ratioed together.
- Calf Temperament at Weaning (1-5): **1** = very docile **5** = very wild (please use whole numbers only)
- Mature Cow Size Data -  
Dam's weight at weaning - **optional** Dam's height at weaning - **optional**, in inches to nearest tenth  
Dam's body condition score at weaning - **optional** **1** = very thin **9** = very fat (whole numbers only please)
- Yearling Weight - is mandatory. for bulls only. The actual yearling weight should be taken when the calf is between **320-410** days to avoid an inexact adjusted yearling weight notation. The computer will adjust the weight using 160 days from weaning to yearling as the standard.
- Yearling Hip Height - is **optional**, reported in inches to nearest tenth.
- Date Weighed - is mandatory. The date the yearling weight and height were taken. Different weight dates will designate different contemporary groups.
- Yearling Group I.D. - **optional, use one or two digit number or letter** to denote a yearling contemporary group that would differ from the default contemporary group assigned at weaning.
- Scrotal Circumference - is **optional**, report in centimeters to nearest tenth.
- Pelvic Height (vertical) - is **optional**, report in centimeters to nearest tenth.
- Pelvic Width (horizontal) - is **optional**, report in centimeters to nearest tenth.
- Pelvic Device - is **optional**, **P** = Krautmann pelvimeter (piston) **C** = Rice pelvimeter (caliper)
- Registration information - **check only one box. If not checked, all will be computed.**  
**Register Now** - check this box if you wish to register the animal at this time. Registration fees are listed on the fee schedule.  
**Compute Only** - check this box if you wish to compute the animal.  
**Transfer Included** - check this box if you wish to transfer the animal and complete an application for transfer. If you check this box, the animal will automatically be registered and transferred to the person listed on the application for transfer. Both a registration and transfer fee are required.
